The Defense Supply Center Philadelphia's General and Industrial Directorate provides supply chain integration for a variety of move and store material, equipment and services--everything from construction equipment, prefabricated structures and storage tanks to material handling equipment, pallets, rope & rigging and containers.

Initiatives:

DSCP has three different prime vendor initiatives to meet your material handling needs. Our Material Handling Equipment (MHE) initiative uses a vendor managed distribution system to supply 463L aircraft loaders; material handling/lifting devices and parts. Vehicle OEMs supported include Hyster, John Deere, Oshkosh and Emerson.

DSCP's Material Handling Initiative (MHI) provides all products associated with the day-to-day business of running a warehouse. This initiative also supports pallet management, including the furnishing of new wood pallets, repaired wood pallets and pallet scrap wood removal. Features of these prime vendor programs include material returns, direct vendor access, commercial delivery of brand name products (see side bar for benefits).

Our third initiative is to supply all types and sizes of drums (including hazmat drums) and cans in FSC 8110. Norfolk Naval Shipyard will be the pilot site, but we expect to expand to entire CONUS and Pacific region.

For more information on MHE, contact Eileen Brown at (215) 737-7547, email: ebrown@dscp.dla.mil. For more information on MHI, contact Susan Weber at (215) 737-7383, or email:

sweber@dscp.dla.mil. Point of contact for the drums is Ann Friend at (215) 737-7520, email: afriend@dscp.dla.mil.

Prime Vendor Benefits

- * competitive pricing
- * brand names
- * reduced inventory
- * reduced storage handling, delivery and procurement costs
- * increased readiness and sustainment capability
- * increased responsiveness
- * reduced personnel costs
- * opportunities for infrastructure streamlining

New Products Available:

FSC 8145-- A long-term contract has been awarded to AAR Cadillac to provide specialized containers. These containers are certified for airlift and helo operations, and are weather proof and sand proof. They can be customized to meet individual customer needs. Customization includes racks and shelving, kits, dehumidifiers, and accessory configuration kits. POC is Cindy Ciardullo (215) 737-7406.

Containers-- 20' and 40' dry freight, steel cargo containers either new or refurbished are now available. These containers conform to the standard industry sizes for your shipping and storage needs. They are forklift tested to 16,000 lbs. per 44 square inches. They come standard with two doors that open at one end. These containers can be customized to meet your specific requirements. Expandable shelters are also available under this contract. POC is Cindy Ciardullo at (215) 737-7406.

Sandbags-- DSCP offers a variety of sandbags for your strategic needs. Standard 26" x 14" bags are available in polypropylene, green or tan; cotton duck; or acrylic, green or tan. POC is Kevin Light at (215) 737-7527.

Sandbag Filling Machine-- We have a long-term contract for sandbag filling machines. One is a gravity fed machine that can fill up to 400 to 500 sandbags per hour from a two man station. Another is an automated bag filling system that can fill 3 bags at once with sand, soil, mulch, gravel, stones and other materials. For transporting your sandbag filling machines, a trailer is also available. The contractor is quoting delivery within 30 days after receipt of order. POC is Kevin Light at (215) 737-7527.

(continued on back)

Transport & Storage Case Set-- A long-term contract has been awarded for NSN 8115-00-663-0213. This case set consists of two cases for the shipment and storage of miscellaneous small parts. The contract includes direct vendor delivery to the customer. POC is Cindy Ciardullo (215) 737-7406.

Stacking Systems-- We have three long-term contracts in place to support various stacking systems requirements. Two of these contracts are with Stanley Storage Systems – one is for standard stacking systems and the other is for hazardous material stacking systems. The third contract is with Ridg-U-Rak for standard stacking systems. Prenegotiated benefits result in significant price discounts; choice of MILSTRIP or MIPR ordering; free estimates; quick order placement; and orders tailored to your specifications, including custom options, hydraulics, and installation configurations. POC Donna Foglia at (215) 737-7418.

Corrugated Shipping Pallets-- These pallets are collapsible, lightweight, have four-way entry for forklift or pallet jack, and, best of all, are reusable. Since they weigh less than conventional pallets, shipping costs are less and they are easily set up for use or collapsed for storage. We offer seven different sizes to accommodate all your shipping and storing needs. POC Donna Foglia at (215) 737-7418.

Need a **Tailored Logistics Support Package**? Let DSCP support your specific move and store needs. Give us your requirements and we'll create a custom tailored logistics support package to meet your needs. For instance, we recently awarded a five-year indefinite quantity contract for berm liners tailored to fill all fielding requirements for the U.S. Army TACOM.
